

## WOMEN DOING A FULL SHARE

Mrs. Coolidge Believes in  
Good Sense of Her  
Own Sex.

## DISCUSSES HIGH COST

Present High Prices, as Well  
as Domestic Problems, Due  
to Fear of Work.

BY ESTELLE BENNETT

Mrs. Coolidge sat in a day coach on a slow train between Boston and Northampton, and talked about her husband, her children, the high cost of living and the domestic problems. The conductor and the brakemen stopped as they went through the car to talk to her. She had made friends with them in her frequent journeys, and had been to keep in touch with her children in school in Northampton, and her husband at his duties in the state capital. She talked of the high cost of living, but so far as the high cost of living is concerned, she believes that the matter now is entirely in the hands of the voters.

"I think the only thing the women of the country can do now," she said, with the quiet conviction of one who has thought it all out, "is to vote for the men whom they think will make the right laws and see that they are enforced. They have done all they can in the home. I think the reason there is so much sugar on hand now is because people are doing without it in their homes. I think the reason woolen mills here in New England are closing down or running half time is that women are wearing their old clothes rather than pay the exorbitant prices for new ones."

"American women have done, and still are doing, their full share. They have sacrificed and saved and substituted and made over. But that isn't enough. They'll have to vote the high cost of living down."

"Here, in New England, where it is a little hard for us to give up pie," she laughed at the tradition that has become a joke, "we have learned to use all kinds of clever substitutes for butter and lard, and in my own household we have experimented with different fruit combinations to find something we like and that will take the least sugar. Apples must be tart to make good pie, but we have found that blueberries take less sugar and the combination of apples and blueberries, half and half, is delicious, requires less sweetening than apples and has more character than the blueberries alone."

The domestic problem which is closing homes all over the country and increasing the hotel population, is something of which Mrs. Coolidge knows. She never keeps but one maid and she never has been without one. In the fifteen years of her

## "Maud" in Real Life Tries to Kick Street Car Off of the Track

ALBANY, N. Y., Oct. 9.—An elderly maid, said to be the prototype of Miss Maud of comic programs, blocked traffic at Marlboro and John streets and kicked a car off of a trolley car that stopped slightly late here.

The maid was being led by a young negro up Marlboro street, when she balked at the trolley car. The motorist got out and with up against the car and he drove up to kick at the car. It was a horrible accident.

The maid was badly injured near the curb and the car and other traffic proceeded unhindered.

She was taken to the hospital and is expected to recover.

There must be a reason for this, she said. It was suggested to Mrs. Coolidge, and she thought about it. There was a reason. She thought about it.

She was taken to the hospital and is expected to recover.

## Stole Preacher's Suit While Was Baptizing Bunch of Converts

DALTON, Ga., Oct. 9.—A Chatham county colored minister recently came here to conduct a revival meeting. He got away with it in good shape, and finally the big baptizing was scheduled to take place in Bear creek.

The preacher, after reaching the scene, modestly repaired to the house, and disrobed, donning his baptismal robes and entering the creek. After the baptizing, he returned to the house, and found while he had been engaged in the Lord's work some one had stolen his clothes, and he had to return to Dalton in the same garments.

The lesson they learn in the Congregational church and Sunday school at Northampton. They avoid difficult and unfamiliar music, because the object of the orchestra is to give pleasure, not to educate. That is a part of Mrs. Coolidge's educational policy—that children should work when they work and play when they play and keep the two separate. That was why she sent her boys to the public

schools of Northampton when they were five years old. She doesn't believe in a "camouflaged education."

Every morning, when she is in Northampton, Mrs. Coolidge takes her Boston bag and goes to market. If the neighbor next door is going, Mrs. Coolidge goes with her in the car. Otherwise she walks. She has no domestic policy she buys, she says, "what the family need and can afford."

REVIVAL ON AT SPRINGDALE

Series of Meetings Now Begun In Suburban Community.

The first revival ever undertaken in the northeastern suburbs is now in progress at the Springdale school, corner Lewis and Washington streets, and the people of that community are anxious that it be made a success. Meetings will be held each evening at this week and probably longer, under the conduct of Rev. W. T. Scott as evangelist.

The people of Tulsa are well acquainted with Brother Scott and his success in evangelistic work is a foregone conclusion. A large tent, seating 250 people has been set up just across the street from the Springdale school, and it is hoped to keep it filled to overflowing.

Modern electrical treatments have no comparison with the old crude electric batteries and shocking currents. At the Electro-Therapy Institute, 216 1/2 S. Boston St., the current that lights homes and runs street cars is used and is harnessed to the wonderful machines by which every jar and jerk is removed and it is then sent through the body as a ray of sunshine, which penetrates each corner and crevice. The currents are refreshing—delightful. One apparatus sprays electricity through the patient, absorbing fibrous and decayed tissues, there being thousands of volts of electricity going through the body—yet the patient only experiences a sensation as of standing in a ray of sunshine. After the treatment the patient feels like a normal healthy person on an ideal spring morning.

The Tulsa Electro-Therapy Institute at 216 1/2 South Boston street is rightly called a "Healthy Place for Sick People." The above picture shows an X-Ray being made through a wall. An X-Ray examination as well as Electrical treatments are painless, harmless and safe and are the most modern methods for the diagnosis and treatment of disease.

While there is no sensation of the high voltage current going through the body, the patient may become aware of the force in his system by the doctor touching him and drawing out a string of sparks from any part of the body or igniting a sheet of paper from the body—or even illuminating an electric globe whilst the patient holds the globe in his hand—all the time the patient feels nothing.

The effects of electrical treatments are marvelously rapid.

Among the diseases treated by these specialists are chronic and deep seated diseases of the nervous system, blood, heart, liver, kidneys, bladder, spine, brain, also rheumatism, paralysis, epilepsy, gall stones, goitre, indigestion, constipation, dyspepsia, catarrh, deafness, asthma, neuritis, rupture, and other diseases of women and men.

Consultation, advice and examination, including the X-Ray, Chemical Analysis and Blood Pressure Test entirely free. Such is the offer made by the Electro-Therapy Doctors to the sick and ailing who call upon them during the next seven days.

The Electro-Medical Institute is located on the second floor at 216 1/2 South Boston St. (between Second and Third streets).

Office hours are daily 9 a. m. to 3 p. m. except Tuesday and Friday, when hours are 9 a. m. to 6 p. m. Sunday hours are 10 a. m. to 1 p. m.

FOR SUFFERERS.

"In cases of rheumatism, asthma, kidney diseases and also in neuritis with high arterial tension, the application of high frequency currents causes a reduction of the blood pressure. This reduction is progressive from one treatment to another and occurs in cases of arterio-sclerosis (high blood pressure) for which the high frequency currents are an excellent treatment."

Supreme.

"Electricity, with its wonderful power to relieve suffering and cure disease, is supreme. It is Nature's method regulated by human ingenuity."—Electro-Therapy Doctors.

TO THE PUBLIC:

"I have been ailing for about six years with stomach trouble, nervousness, and rheumatism. I was bloated most of the time, was weak, nervous and had rheumatic pains all over. My condition became so bad three months ago that I had to discontinue work altogether."

"Former treatment I have taken did not give me any results so I started treatment with The Electro-Therapy Doctors at 216 1/2 S. Boston street three weeks ago."

"At present my condition of health is as follows: I do not bloat now and my stomach does not bother me; my nervousness has entirely disappeared; I am much stronger, and my rheumatism only bothers me a trifle now in my left wrist."

"This statement is voluntarily given by the Electro-Therapy Doctors for publication."

(Signed) F. A. OBERMILLER, 405 North Denver Avenue.

The above is but one of many voluntary statements of praise given by the Electro-Therapy Doctors to pleased and benefited patients.

## X-Ray Examination FREE This Week

BEST TREATMENT  
FOR THE AILING

FREE OFFER EXTENDED ANOTHER SEVEN DAYS.

The diagnostic and treatment apparatus used at the Electro-Medical Institute are many. The machines—delicate and intricate electrical devices—find the cause of the trouble with astonishing accuracy. At the Electro-Therapy Institute the fact is proven that science has so modified and tamed electricity that the most delicate man, woman or child need have no fear either of having an X-Ray examination made or taking electrical treatments. The X-Ray and electrical treatments are harmless, painless and safe in the hands of experts.

Modern electrical treatments have no comparison with the old crude electric batteries and shocking currents. At the Electro-Therapy Institute, 216 1/2 S.
